## SKILLS

- Python Programming
- Java & C
- Front-End Development
- PHP & MySQL
- Git & GitHub (Version Control)
- Problem Solving & Analytical Thinking
- Team Collaboration
- Basic Data Structures & Algorithms

## LANGUAGES

- English (Fluent)
- Hindi(Fluent)
- Marathi (Intermediate)
- Japanese (Basic)

## CERTIFICATIONS

AI Foundation – Oracle  
(Currently Pursuing)

## PROFILE

Highly driven B.Tech student with expertise in Artificial Intelligence and Machine Learning, possessing a solid grasp of programming languages including Python, Java, and front-end development, seeking to leverage technical expertise, analytical capabilities, and collaborative approach to drive the development of cutting-edge software solutions and AI-powered innovations.

## PROJECTS

### MusicΦ

Music Website (PC-based)

- Created a desktop-friendly music website using HTML and CSS.
- Designed an interface for browsing songs, playlists, and categories.
- Practiced front-end design concepts like layout, styling, and navigation.

### Sizzle & Spice

Restaurant Website with Database

- Built a restaurant management website with HTML, CSS (frontend) and PHP + MySQL (backend).
- Implemented dynamic features such as menu updates, reservations, and customer data storage.
- Strengthened skills in full-stack development and database connectivity.

### Bank System

Bank Management System (Data Structures Project)

- Designed and implemented a Python banking system as part of a Data Structures project.
- Features included account creation, deposit, withdrawal, and transaction history.
- Applied linked lists, queues, and file handling for efficient record management.

### Jarvis

Jarvis Bot (In Progress)

- Using Python (speech recognition, text-to-speech, and automation APIs) for interactive functionality.
- Planned features include web search, application control, and voice interaction.

## EDUCATION

Bachelor of Technology in AI&ML

2024 - 2028

Bharati Vidyapeeth Deemed to be University, Navi-Mumbai

SGPA: 8.30/10
